ExoGems PHP site

Contents

Uvod

Uvod u kod

Pod naslovom Funkcionalnosti ce se nalaziti samo funkcionalosti tog naslova dok ce se deo za Admin panel i njegove funkcionalnosti prikazati pod drugim naslovom.

Za svaku stvarinicu je odradjen poseban js file.
Za kljucne stvari poput registracije, logovanja, brisanja korisnika i tako dalje koriscen je ili Fetch API ili AJAX.

Korisceni programski jezici:

- → PHP
- → CSS
- → JavaScript
- → SCSS
- → SQL
- → CSS

Koriscene biblioteke:

- → JQuery
- → Bootstrap

Funkcionalnosti sajta

Ovde cu napisati globalne funkcionalnosti sajta, a u nastavku cu za svaku stranicu detaljnije opisati funkcionalnosti.

1. Dinamicko Ispisivanje Na Osnovu Upita Iz Baze Podataka
2. Dinamicki Header (Navigacija)
3. Autorizacija Korisnika
4. Registracija Korisnika i Aktivacija Naloga Preko Mail-a
5. Paginacija Proizvoda
6. Filter Proizvoda
7. Sort Proizvoda
8. Search Proizvoda
9. News Letter
10. Popunjavanje Ankete.

11. Korpa za svakog korisnika
12. Porucivanje Proizvoda i konfirmacioni mail
13. Konfirmacija Porudzbenice (Kao racun za tu kupovinu)
14. Uvid u istoriju kupovina proizvoda
15. Kontakt stranica za obracanje Adminima Stranice
16. Zastita od neovlasnjenih pristupa odredjenim stranicama
17. Admin Panel (Posebna stranica o funckionalnostima Admin Panela)

Dinamicko ispisivanje header-a iz bazepodataka

Iz baze se dohvataju podaci o putanjama i u odnosu na to da li je korisnik ulogovan i koja mu je rola se ispisuju razlicite putanje.

Ukoliko je korisnik ulogovan imace sledece putanje:

→ Home
→ Shop
→ Contact
→ About
→ Log out
→ Cart

Ukoliko korisnik nije ulogovan bice mu prikazano:

→ Home
→ Shop
→ Contact
→ About
→ Register
→ Log in
→ Cart (Onemoguceno dok se ne uloguje)

Ukoliko je admin:

→ Home
→ Shop
→ Contact
→ About
→ Admin
→ Log out
→ Cart

Index.php

Dinamicki ispis sadrzaja

Za ispis best sellera se iz baza dinamicki dohvataju oni proizvodi kome je prodanost veca od prosecne prodatosti

Za ispis „Barely left in Stock" proizvoda se dinamicki iz baze dohvataju podaci kojima je dostupnost manja od prosecne dostupnosti proizvoda.

Anketa

Nakon sto korisnik odgovri na pitanja vise nece moci da odgovori ponovo.

Odgovori se salju ka serveru koriscenjem Fetch api-a.

Dinamicki se ispisuju pitanja i odgovori.

Ukoliko korisnik nije ulogovan Nece mu se ni prikazati anketa.

Newsletter

Korisnici mogu da se prijave i odjave sa newsletter-a

Ukoliko je korisnik prijavljen na newsletter dobice mail u slucaju kada admin doda novi proizvod na shop.

Category.php
Category.php je shop stranica sajta.

Paginacija
Paginacija se vrsi nadovezivanjem LIMIT i OFFSET klauzula dinamicki na osnovu izabrih polja

Inicijalni upit:

```
$query = "SELECT p.id as id, mp.material_id as materialId, p.name as name,
cat.name as category, pic.path as imgSrc, p.text as text, pri.price as price,
p.unitsSold as unitsSold, p.category_id as catId  FROM products p JOIN
pictures pic ON p.picture_id = pic.id JOIN category as cat ON p.category_id =
cat.id JOIN prices pri ON pri.product_id = p.id JOIN materials_products mp ON
mp.product_id = p.id ";
```

```
$offset = ($page - 1) * $perPage;

$query .= " OFFSET " . $offset;
```

Broj stranica se racuna na osnovu COUNT upita podeljeno sa brojem proizvoda po stranici koje je korisnik izabrao kroz interface.

```
$countResult = $conn->query($countQ)->fetch();
$products = $conn->query($query)->fetchAll();

//Broj proizvoda u bazi koji odgovaraju kriterijumu
//Na osnovu tog broja i broja proizvoda po strani dolazimo do
    //-> broja stranica
$countResult->ProductCount;

$pages = ceil($countResult->ProductCount / $perPage);
```

Zatim toga sledi samo ispis tih istih proizvoda dobijenih iz inicijalnog dinamickog upita.

Filtriranje

Filtriranje je deo dinamickog upita na koji dovezujem WHERE klauzulu.

U slucaju da su stiklirani neki od kriterijuma filtera tu vrednost nadovezujem na upit.

```
if($categoryId && is_numeric($categoryId)) {
    $where .= " AND p.category_id = " . $categoryId;
}
if($materialId && is_numeric($materialId)) {
    $where .= " AND mp.material_id = " . $materialId;

}
```

Sortiranje

Sortiranje je takodje sastavni deo paginacije, takodje dinamicki pravim isti upit.

Koristim mapu sorta i u slucaju da se vrednost sorta pokupljena sa interface-a poklapa sa nekom od vrednosti iz mape onda nad upit nadovezujem ORDER BY klauzulu

```
$order = " ORDER BY ". $sorts[$sortBy];
```

Uvid u istoriju kupovina za korisnika

Na klik na dugme redirektujem korisnika na posebnu stranicu za uvid u istoriju.

U bazi Podataka u „cart" tabeli imam kolonu „status", ako je ona setovana na 0 znaci da je ta korpa za tog korisnika neaktivna sto znaci da je deo istorije tog korisnika.

Sa obzirom da onda korisnik moze da ima vise neaktivnih korpi na ovoj stranici se prikazuje za svakog korisnika svaka neaktivna korpa i svaki proizvod koji se nalazi u njoj -> Pod imenom Order #n

Takodje Uvid u posebne kupovine korisnik moze da vidi i preko maila preko order identifikatora koji se nalazi u tabeli checkout. Tu moze videti kada je porucio taj proizvod.

Contact.php

U slucaju da sve provere prodju na frontu obracam se serveru koristeci Fetch Api i u slucaju uspesne poslate poruke korisnik je obavesten porukom sa servera.

Cart.php

```
exogems cart
🔑 id : int(11)
# user_id : int(11)
▣ created_at : datetime
◇ status : bit(1)
```
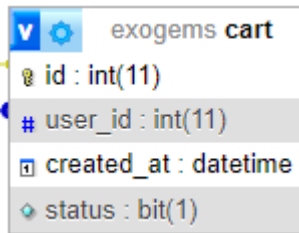

Kolona status sluzi da naznaci da li je ta korpa za tog korisnika aktivna ili ne. U slucaju da nije znaci da je deo istorije kupovanja za tog korisnika.

Ovde se prikazuje korpa koja je sa statusom 1 i ona mora biti samo jedna za tog korisnika.

Korisnik moze da ocisti korpu. Na to gudme se Brisu svi proizvodi iz aktualne korpe ali se ne brise korpa.

Dugme proceed to checkout nas vodi to checkout.php

Checkout.php

Na ovoj stranici korisnik navodi adresu na koji zeli da mu budu isporuceni proizvodi.

Takodje ovde se nalaze i informacije o porudzbini.

Nakon sto korisnik popuni polja za adresu, izabere payment method i prihvati TOS i prodje sve provere, Fetch api-jem saljem podatke serveru da bih se racun napravio.

Ako je operacija pravljenja racuna uspesna onda ce se korisnik redirektovati ka stranici confirmation.php. Takodje se ta korpa i stavlja na status 0.

U slucaju da ne uspe operacija znaci da je iskljucio javascript u browseru i da pokusava dopreti do servera na maliciozni nacin -> server vraca Inetrnal Server Error status code (500).

Confirmation.php

Ako je korisnik dosao do ove stranice znaci da je proces kupovine zavrsen.
Takodje korisniku stize mail sa linkom ka ovoj stranici sa njegovim order identifikatorom kako bi on mogao da pogleda informacije o toj porudzbini.

Register

Nakon sto korisnik popuni podatke o registraciji i prodju proveru na frontu posaljem podatke AJAX-om i nakon sto prodju provere i na serveru onda se kreira nalog za tog korisnika koji nije aktiviran. Klikom na poslat mail o konfirmaciji se nalog aktivira.

Ukoliko mail vec postoji server vraca takvu poruku i ne pravi novi nalog.

Login

Korisnik popunjava podatke o logovanju i nakon sto oni prodju klijentsku proveru saljem ih na server putem AJAX-a, potom se podaci provere i na serveru i nakon toga se setuje sesija za korisnika ako su svi podaci ispravni i ako korisnik ne postoji,

U suprotnom se izdaje primerna greska ka klijentu.

Admin.php

Kontrola korisnika

Admin ima uvid u korisnike, moze ih brisati aktivirati i deaktivirati gledati im porudzbine i dodavati nove korisnike.

Za brisanje koristim fetch api za sve ostalo se korisilo form action

Uvid u kontakte

Admin ima uvid o svim kontaktima, ko ih je poslao, poruku i naslov poruke.

Newsletter
Admin ima uvid u sve korisnike koji su prijavljeni na newsletter.
Ima mogucnost da ih prijavi, odjavi kao i da ih blokira iz newslettera.

admin-add-product.php -> Admin moze da dodaje novi proizvod
Admin dodaje informacije o proizvodu i nakon sto prodju svu proveru pokrece se tranzakcija, ako ona uspe admin se redirektuje na admin panel.

Takodje se vrsi obrada fajlova.

admin-edit-category.php
Admin ima mogucnost uvida brisanja izmena kao i dodavanje novih kategorija u bazu podataka.

Koji ce se kroz sajt prikazati u kategoriji itd.

admin-edit-material.php

Takodje i za materijale, korisnik moze da dodaje brise i menja sve materijale na sajtu.

About.php

Template

Template link:
https://themewagon.com/themes/free-bootstrap-4-html5-online-shopping-website-template-aroma/

Uvod u template
Dizajn Template je izmenjen. Sav javascript template je izbrisan kao i sve biblioteke koje je template koristio

Struktura fajlova

Style.scss:

2.
Nalazi se minifikovan template css, sve do linije

Od druge linije koda sledi sopstveni css.

main.css

Template minifikovan kod

Img:

Putanja: /img/

Nalaze se slike iz template

Putanja:/img/non-template

Nalaze se sve custom slike koje su koriscene za modifikovan template

Js
Nalazi se svi javascript fajlovi (vise o njima posle)
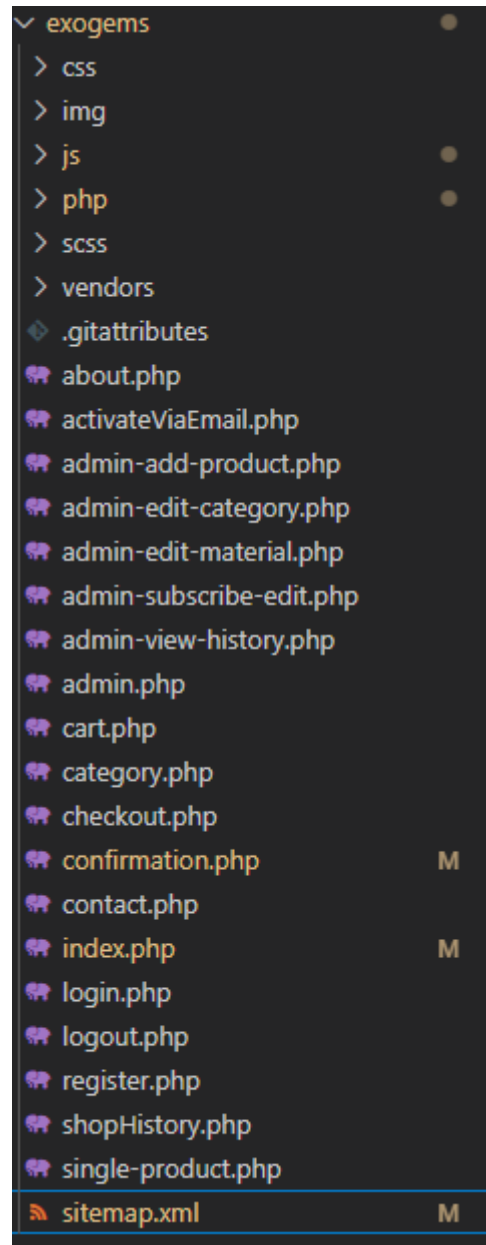

Svi js fajlovi sluze za provere podataka prikaz poruka sa servera i slanja zahteva ka serveru.

```
∨ js                          ●
  JS admin-subscribe.js
  JS admin.js
  JS cart.js

  JS index.js                 M
  JS login.js
  JS register.js
  JS shop.js
```
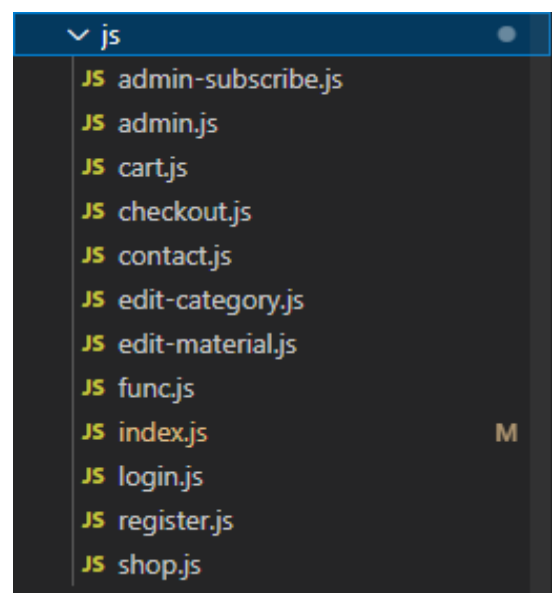

php

Ovde se nalazi sva logika

Oznacio bih

Conn.php tu se nalazi kod za konekciju.

Logic.php u njemu se nalaze SVE sql funkcije koje se pozivaju sirom sajta – sem funkcije za paginaciju ona je u category.php

```
php
  addCategory.php
  addMaterial.php
  addToBasketLogic.php
  adminAddUserLogic.php
  answerSurvey.php
  blockSubscribeLogic.php
  checkLoginAndActive.php
  checkoutLogic.php
  conn.php
  deleteCartLogic.php
  deleteCategory.php          M
  deleteMaterial.php          M
  delSingleItem.php
  editCategory.php            M
  editMaterial.php            M
  footer.php
  head.php
  header.php
  insertContact.php
  logic.php
  loginLogic.php
  registerLogic.php           M
  removeUser.php
  setToActive.php
  setToInactive.php
  subscribe.php
  subscribeLogic.php
  UNblockSubscribeLogic.php
  unsubscribeLogic.php
```

Kodovi

Index.php

```php

            <h2>Branislav Radovanovic 31/22</h2>
            <p class="my-3">I'm Branislav Radovanovic, a versatile software
engineer with a passion for web and game development. I'm currently studying
ICT at college, and I'm excited to pursue a career in programming. Apart from
programming, I have a rich sports background. I played volleyball for 14
years, and I was a part of the junior team that was in the top 8 in the
country. Later on, I played with seniors and achieved 1st place in the Serbian
league. This experience taught me the importance of teamwork, communication,
and hard work, skills that I apply to my programming projects.</p>
            <p>
                I'm

            constantly exploring new technologies and programming languages,
and I enjoy creating websites and games that are both functional and visually
appealing. My skills include HTML, CSS, JavaScript, React, Node.js, and more.
I always strive to improve my skills and keep up with the latest industry
trends. In the future, I hope to work on exciting projects that challenge me
and allow me to grow as a developer. I believe that with my strong work ethic,
dedication, and technical skills, I can make a valuable contribution to any
team or project.
            </p>
